SUMMARY

Full-Stack Developer, AI Automation Engineer and Reverse Engineer specializing in high-performance web applications and intelligent business automation with Next.js, Django REST Framework, Node.js and n8n. Founder of a technology agency and an e-commerce brand, delivering enterprise-grade Progressive Web Apps that eliminate operational bottlenecks.

EXPERIENCE

Founder & Lead Automation Engineer | Webpulse Automation

Dhaka | 2024 - Present

- Design n8n workflows and Messenger order bots that cut manual workload by **70%+**.
- Engineer real-time API integrations between client databases and third-party services.

Full-Stack Developer | Freelance

Remote | 2023 - Present

- Deliver Django REST and Next.js apps with JWT authentication and mobile-first PWAs.
- Improve engagement through performance optimization, SEO and motion design.

Founder & E-Commerce Director | Ponyopuri

Dhaka | 2023 - Present

- Founded and manage an online fashion brand with automated order and invoicing.

PROJECTS

AMMS - Madrasah Management System

Django REST, Next.js, PostgreSQL, WhatsApp microservice

Enterprise Progressive Web App for student enrollment, fee collection and result processing, with automated WhatsApp notifications to guardians. almadinamadrasa.pages.dev

Webpulse AutoOrder Engine

Node.js, Meta Webhooks, Gemini AI, PDFKit, n8n

Automation engine that converts Messenger orders into PDF invoices with QR codes and sales records, with no manual intervention.

MeZuMir E-Commerce

React, Next.js, Tailwind CSS

Grocery e-commerce platform featuring category filtering, a shopping cart and an optimized checkout flow. mezumir.pages.dev

BD Mess Management

Next.js, React, Tailwind CSS

Web platform for tracking daily meals, accounts and market expenses for hostels and messes. bd-mess.pages.dev

Additional Projects: The projects above are a selection of my work. A broader collection is available at labibfohayer.pages.dev and github.com/labibfohayer.
